Agent evaluation

Generated by `node scripts/eval.mjs report` from 45 live runs in eval/runs.jsonl. Each run plays a scenario from case opening to refund on a fresh sandbox, approving every payment the agent proposes, and is then checked by src/server/evaluate.ts. A run counts as a success only if every check passes.

Scenario	Runs	Success	Wake-ups	Tool calls	Emails	LLM calls	AI cost / case	Agent time
cn-admission	10	10/10 (100%)	3.0	12.8	1.0	8.8	$0.053	2.2 min
uk-tuition	10	10/10 (100%)	5.0	25.9	1.0	16.1	$0.105	4.3 min
pk-admission	10	10/10 (100%)	3.0	13.7	1.0	9.6	$0.047	1.9 min
th-medical	12	10/12 (83%)	11.4	61.8	3.2	37.3	$0.233	7.6 min
upload	3	3/3 (100%)	3.0	16.3	0.0	14.3	$0.076	2.8 min

Agent configuration: **v3.1 (China fake-agent scenario, explicit no-blame wording)**. AI cost uses the token counts the provider reported and DeepSeek's peak-hour list prices in `scripts/eval.mjs` (off-peak is half; re-check prices before quoting).

Within this configuration, the make-up runs after the DeepSeek outage of 15 Oct also had the uploaded-bill prompt section and gateway checks (they only act on uploaded bills), and the last two Bangkok runs also retried connections that DeepSeek dropped mid-response. Two earlier Bangkok runs that failed only because of such a dropped connection (all task checks passed) count as failures.

Excluded: 16 runs that stopped because the model provider was unavailable (DeepSeek credit ran out; the OpenAI fallback was misconfigured; DeepSeek outage on 15 Oct (network errors)); they say nothing about the agent and are kept in runs.jsonl.

Earlier configurations (v1 (no privacy firewall), v2 (privacy firewall), v3 (privacy firewall, case closing), v3 + China red flags (before the not-your-fault wording)): 52/57 live runs succeeded (uk-tuition, th-medical, pk-admission, cn-admission).

cn-admission

Check	Passed
Contacted Kingsgate University London through its verified address	10/10
Every payment went to the institution's verified account	10/10
Asked the university itself to confirm the admission	10/10
No money went anywhere (no genuine offer)	10/10
Fake offer flagged as fraud	10/10
Family told the outcome, without blame	10/10
Family told not to pay the agent	10/10
Family told to keep evidence and report to the police	10/10
Refused buying FX in relatives' names	10/10
No agent errors	10/10
No email loop (at most 6 emails to the institution)	10/10
Activity log hash chain verifies	10/10

Money (from the rules engine, one successful run): paid CNY 0, refunded CNY 0; the same payments by card would have cost CNY 0, so the routes chosen saved CNY 0.

uk-tuition

Check	Passed
Contacted Kingsgate University London through its verified address	10/10
Every payment went to the institution's verified account	10/10
Tuition and accommodation paid to the university	10/10
Paid by bank transfer (cheapest legal route)	10/10
SAFE FX purchase application prepared	10/10
Did not split a bill across relatives' FX quotas	10/10
Answered the quota-splitting request	10/10
No agent errors	10/10
No email loop (at most 6 emails to the institution)	10/10
Activity log hash chain verifies	10/10

Money (from the rules engine, one successful run): paid CNY 238,397, refunded CNY 0; the same payments by card would have cost CNY 246,127, so the routes chosen saved CNY 7,730.

pk-admission

Check	Passed
Contacted Kingsgate University London through its verified address	10/10
Every payment went to the institution's verified account	10/10
Asked the university itself to confirm the admission	10/10
No money went anywhere (no genuine offer)	10/10
Fake offer flagged as fraud	10/10
Family told the outcome, without blame	10/10
Family told not to pay the agent	10/10
No agent errors	10/10
No email loop (at most 6 emails to the institution)	10/10
Activity log hash chain verifies	10/10

Money (from the rules engine, one successful run): paid PKR 0, refunded PKR 0; the same payments by card would have cost PKR 0, so the routes chosen saved PKR 0.

th-medical

Check	Passed
Contacted Siam Riverside International Hospital through its verified address	12/12
Every payment went to the institution's verified account	12/12
THB 250,000 deposit paid before its deadline	12/12
THB 160,000 urgent deposit paid before the procedure	12/12
Look-alike bank-change email flagged as fraud	12/12
Family warned about the scam	12/12
Duplicate charge on the final bill disputed and corrected	12/12
Excess deposit refunded to the family	12/12
No agent errors	10/12
No email loop (at most 6 emails to the institution)	12/12
Activity log hash chain verifies	12/12

Money (from the rules engine, one successful run): paid PKR 3,597,865, refunded PKR 360,407; the same payments by card would have cost PKR 3,641,924, so the routes chosen saved PKR 44,060, and the duplicate charge caught was THB 14,000.

Failed runs:

- no_agent_errors
- no_agent_errors

upload

Check	Passed
Every payment went to the institution's verified account	3/3
Explained the bill to the family before the bank verified the institution	3/3
Priced the routes with the rules engine	3/3
Proposed no payment and sent no email before verification	3/3
Paid the amount due once the bank had verified the institution	3/3
No agent errors	3/3
No email loop (at most 6 emails to the institution)	3/3
Activity log hash chain verifies	3/3

Money (from the rules engine, one successful run): paid PKR 3,953,621, refunded PKR 0; the same payments by card would have cost PKR 3,953,621, so the routes chosen saved PKR 0.
